

S&S® CYCLE & POWERSPORT INSTITUTE DEALER TECHNICIAN TRAINING FROM AROUND THE WORLD

S&S® DEALER TRAINING AND CERTIFICATION PROGRAMS

S&S® Cycle has selected PowerSport Institute, a division of Ohio Technical College, to conduct its dealer certification program. Skilled PSI instructors will train technicians in the installation and tuning of S&S high performance engine kits, and the repair of S&S high performance motorcycle engines and fuel delivery systems.

S&S Factory Training Center Courses

The Sidewinder Center is an in-depth four day course that covers servicing and rebuilding all S&S engine families and engine kits. The S&S Variable Fuel Injection (VFI) Center is a four day course designed to teach technicians how to better understand and identify fuel injection components and become proficient using the S&S ProTune II to calibrate engines.

Class size is limited to a maximum of six students. With this favorable student/teacher ratio, there is more shop time for more "hands-on" opportunity, including troubleshooting techniques and key diagnostic procedures. These courses will serve S&S dealer technicians from around the world who want to expand their knowledge of servicing S&S high performance products.

We are confident that being recognized as an S&S Pro Tuning Center will increase your sales, and with the additional discounts that go along with that distinction, it won't take long to recover your investment and move on to increased profitability.

DEALER CERTI

SIDEWINDER CENTER

The Sidewinder class is a four day, in-depth course that covers the following S&S® engine families. Your time will be spent both in the classroom and in the shop. You will learn the correct way to measure clearances as well as proper engine assembly techniques.

- Servicing and rebuilding S&S V-Series, and T-Series engines
- Oiling systems, all S&S oil pumps
- Flywheel rebuilding and balancing
- Carburetion
- S&S Hot Set Up@Kit installation

VFI TUNING CENTER

This course is designed to get you on track with the high-tech world of fuel injection. EPA standards are driving manufacturers to fuel inject their bikes, and you are going to have to learn about it if you want to work on late model bikes. The S&S Cycle VFI three day course will teach you to:

- Understand and identify all fuel injection components
- Learn EFI theory
- Tune VFI equipped motorcycles utilizing S&S ProTune II software
- Use a dyno to tune a fuel injected motorcycles
- Troubleshoot fuel injection

PRO TUNING CENTER

Completion of both Sidewinder and VFI Tuning courses will certify the dealer as a Pro Tuning Center. The two longer courses

IMPORTANT NOTE:

All student enrollment is dependant on successful completion of a pre-requisite test for both Sidewinder and VFI courses.

Go to www.psi-now.com/ss-dealer-training-program for complete enrollment course dates, registration materials and link to the pre-requisite testing.

IFICATION

BENEFITS FOR CERTIFIED S&S® DEALERS

Invest in training for you and your employees, and become a certified S&S dealer to reap the rewards!

- **More Business** – Your customers will be certain your shop can provide them the best service possible on their S&S equipped motorcycle
- **Recognition** – the S&S website receives over a half million visits every month and it stands to reason that certified dealers will be more apt to attract customers than dealers who are not certified, see *chart for certification level icons*
- **Preferential Discounts** – S&S dealers who achieve the Pro Tuning Center status will receive additional discounts on S&S products and services, see *chart for dealer levels*

REGISTRATION

All student enrollment is dependant on successful completion of a pre-requisite test for both Sidewinder and VFI courses.

Go to www.psi-now.com/ss-dealer-training-program for complete enrollment course dates, registration materials and link to the pre-requisite testing.
